

How can the revenue enhancement from reducing operating room time and/or turnover times be calculated?

Greater payment from reducing OR time and/or turnover times applies only if lack of OR time is truly the bottleneck to care. [Click here](#) to download a lecture on the topic. [Click here](#) for the abstract of a paper on the topic or [click here](#) for the full text. Although the formal topic of the paper is tactical decision making for selective expansion of OR time incorporating financial criteria and uncertainty in sub-specialties' future workloads, the results are identical for reducing OR time while maintaining the same revenue.
